Dimensions of Organization Design

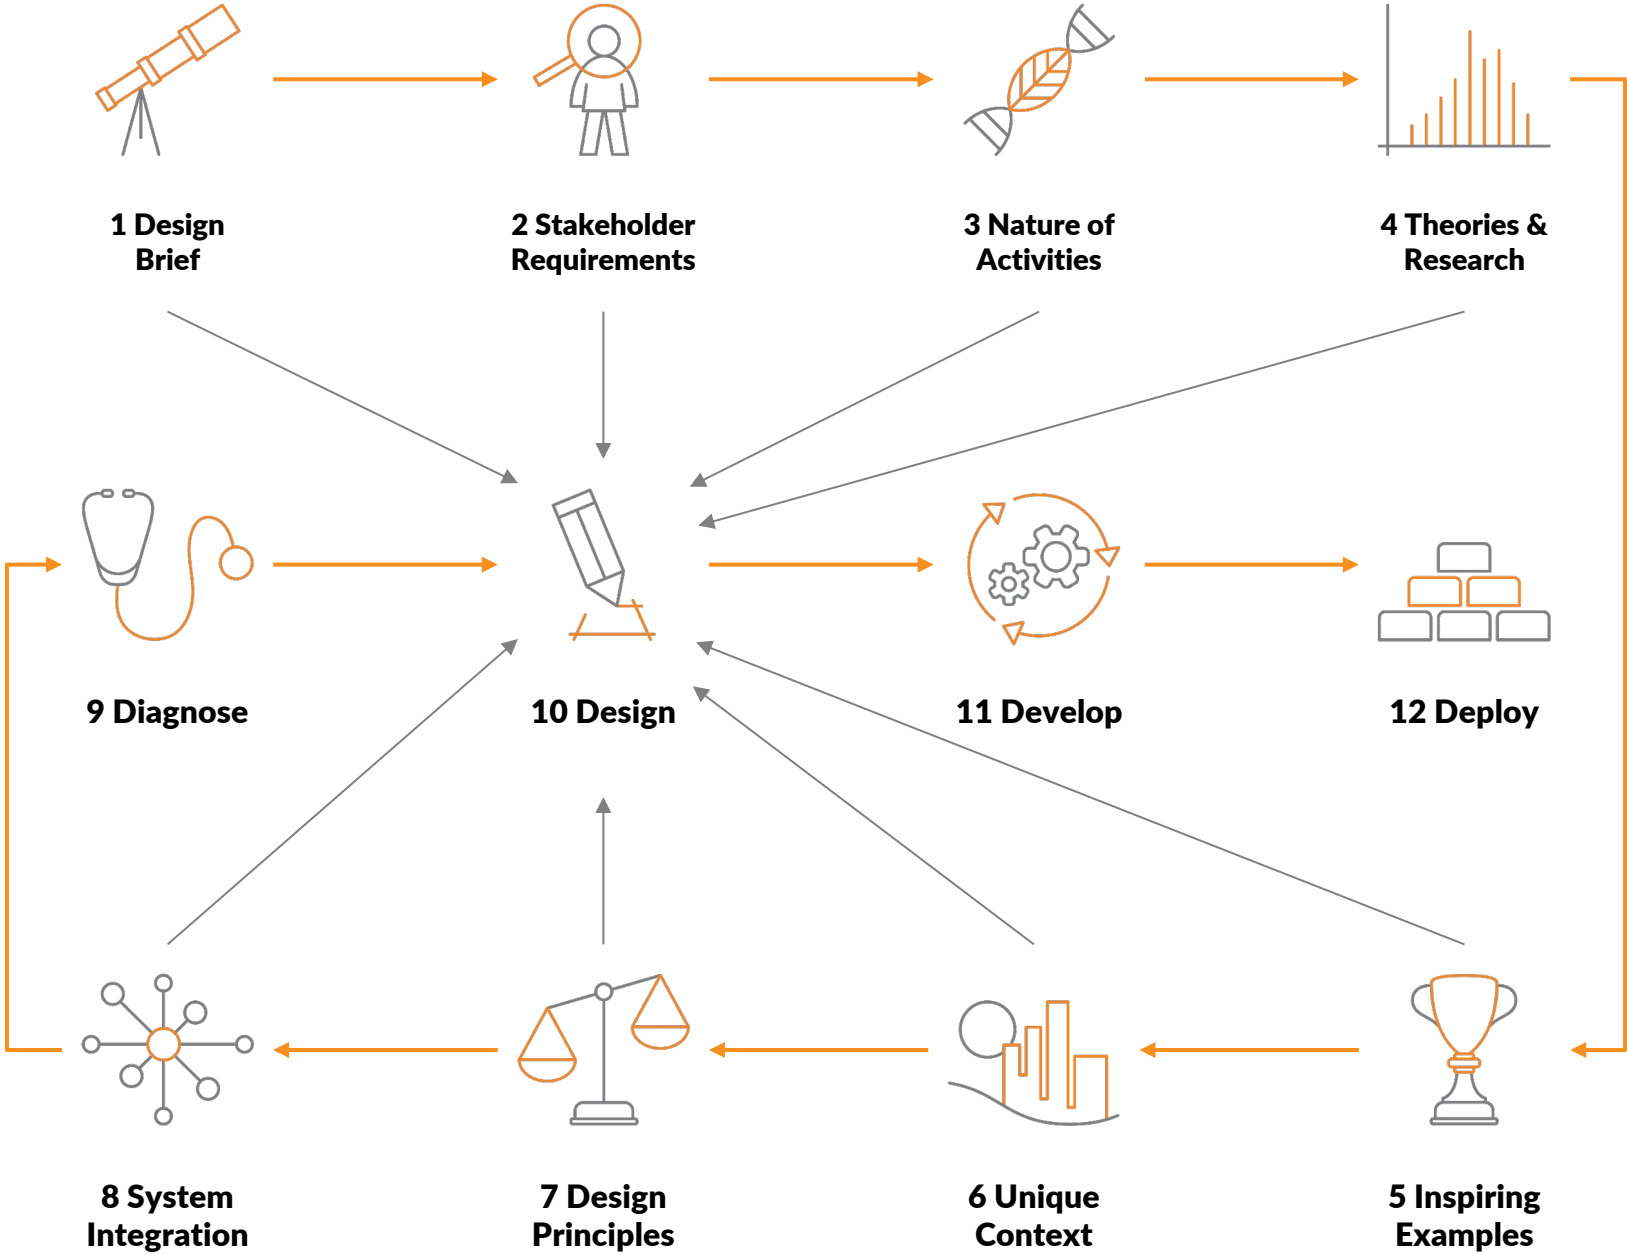

Organization Design Components

<p style="text-align: center;">Leadership</p> <p>Identify and align the leadership responsibilities, styles, rhetoric, and reporting relationships needed to successfully lead those engaged in the activities.</p>	<p style="text-align: center;">Strategy</p> <p>Identify the key strategy influences including purpose, mission, vision, goals, objectives, and resources. Align the activities with the strategy.</p>	<p style="text-align: center;">Governance</p> <p>Identify the legal, ethical, regulatory, and sustainability requirements applicable to the activities. Align the activities with the requirements.</p>
<p style="text-align: center;">Inputs</p> <p>Identify the required inputs to the activities, decisions, etc. and integrate with the systems that provide those inputs.</p>	<p style="text-align: center;">Activities</p> <p>Identify and design the activities required to produce the outputs. Include the decision criteria, tools, techniques, and technologies in the design. Identify and design the connections among the activities, tools, etc.</p>	<p style="text-align: center;">Outputs</p> <p>Identify and define the outputs of the activities and describe how they address the requirements of the customers (internal and external).</p>
<p style="text-align: center;">Workforce</p> <p>Identify the knowledge, skills, and abilities required to execute the system. Align the related training and development, incentives, and support.</p>	<p style="text-align: center;">Scorecard</p> <p>Identify the inputs, activities, outputs, outcomes, and stakeholder measurements that will be used to manage the activities and validate the quality and performance of the design.</p>	<p style="text-align: center;">Culture</p> <p>Identify the key “desired” cultural aspects that are embedded in and support the activities including the organizational values, symbols, rituals, heroes, and practices.</p>
